Sir:

Prior to examination, please amend the above-identified application as set forth
hereinbelow:

IN THE CLAIMS:

14. A constant power control circuit for an electrosurgical generator having a
power selection system and capable of functioning in one or more operational modes
comprising:

a current sampling circuit coupled to an output electrode for generating a current
signal;

a linear conversion circuit electrically connected to the current sampling circuit
for receiving and adjusting the current signal to compensate for the operational mode of
the electrosurgical generator, the linear conversion circuit generating a linear converted
signal; and

a feedback correction circuit electrically connected to the linear conversion circuit
for receiving the linear converted signal, the feedback correction circuit comparing the
